Parts

- A. Power button
- B. LCD backlit display
- C. Gauge
- D. Power switch for mini flashlight
- E. Mini flashlight

HOW TO USE

Make sure to read and note the specifications of your car and tires.

Tire Pressure Gauge

1. Remove the valve cap from the tire.
2. Make sure the display is dark before turning on the tire pressure gauge.
3. Press and release the power button (**part A**) to turn on the gauge. The LCD backlit display (**part B**) will illuminate.
4. After 2 seconds, the display should read 0.0 PSI.
5. Press the power button repeatedly to select the preferred measuring unit (PSI – BAR – KPA)
6. Place the gauge (**part C**) over the tire valve firmly. The gauge can turn 180° for a more comfortable angle. You should not hear any hissing from the valve.
7. Hold for 2 seconds and the display will give an accurate readout of the pressure. The measurement will remain on the screen for 10 seconds.
8. Press the power button for 2 seconds to turn off or the display will turn off automatically after 90 seconds.

*** If the display does not turn to zero before or after it is measured, press the power button (part A) for 3 seconds to turn off and then start again.**

***The effective measuring range for this product is 0–100 PSI. This product works best in temperatures between 32°F to 122°F (0°C to 50°C). Measuring error is ±1.0 PSI.**

Mini LED Flashlight

1. Flip the power switch (**part D**) to the flashlight to turn on or off.

WARNING:

1. Never submerge product in water. Do not use if wet.
2. This product requires 5 'LR44' button cell batteries which are included. Do not attempt to use any other type of battery with this product.
